Summary

A software engineer who is enthusiastic about developing innovative technologies. Among my many interests are artificial intelligence, computer vision, and embedded systems. Working with Java for over a year has given me confidence in integrating successfully and completing the necessary duties.

Experience

Java Software Engineer

Cimspace Technology Services

Sep 2021 - Feb 2022 (6 months)

- Worked closely with Lead developer to develop backend application using Java
- Wrote technical documentations to help frontend team integrate the various backend APIs
- Tested APIs using postman to ensure effective code and integrations

Java Software Engineer

Hardcore Biometric Systems

Mar 2021 - Sep 2021 (7 months)

- Utilized spring boot and maven to create effective code based on feature specifications.
- Shadowed experienced software engineer's for first 4 months to learn the workflow and development processes
- Worked with team to produce smaller apps to further development expertise

Computer Operator

PubTech Business Cafe

Jan 2015 - Jan 2018 (3 years 1 month)

- Helped with maintenance and proper monitoring of equipments used in office
- Resolved complex issues pertaining to clients like software and network connections
- Worked with applications such as Word, Excel, CorelDraw and Photoshop to satisfy the needs of customers

Education

Nile University of Nigeria

Bachelor of Engineering, Computer Engineering

- Built an embedded system focused on blind people for senior thesis project (6 months). (Github-link)
- Took courses related to Software engineering and Artificial networks (this was applied to my senior thesis project)

Skills

• Java • HTML • CSS • JavaScript • PostgreSQL •Microservices • Maven • Git • Arduino • Microsoft Office
• Adobe Photoshop • Adobe XD • Figma
